

Unite2Green Hayward

Together, we can save money on our utility bills, create healthy homes for our families, and protect our neighborhood from climate change.

Unite2Green Hayward is building a climate resilient Jackson Triangle by training youth and adults to lead their neighbors in action. Through a series of workshops and a neighborhood challenge, the Unite2Green Team will empower Jackson Triangle residents to save money and resources; safeguard their health; and protect their community from the effects of climate change.

PEER LEADERSHIP

Unite2Green trains youth and adults to run workshops for their neighbors and introduces them to opportunities in green careers.

SAVE MONEY, GAIN EDUCATION

Residents will learn strategies and discover resources to save \$ on utility bills and create a healthier home environment.

MOTIVATE TO ACTION

Residents are invited to make pledges to become more climate-resilient and join the neighborhood challenge for a chance to compete for prizes.

CITY PARTNERSHIP

As a partner of Unite2Green, the City of Hayward will work closely with residents to ensure the program meets their community needs.
