ICLEI ClearPath Your Community's Climate Planner Tool

Start-to-finish emissions-management support—inventory, forecast, plan, and monitor —with **ICLEI USA's industry-leading climate inventory and modeling tool used by more than 900 cities and counties in the U.S.**

Powerful Planning Tools

Your streamlined solution for community emissions reduction. Leverage our intuitive forecast and planning wizard, backed by extensive ICLEI USA research, to swiftly model high-impact strategies tailored to your community's needs. Pre-filled high-impact action calculators provide instant emission reduction scenarios with further customization options. Explore a range of detailed policies and projects—from energy efficiency to waste diversion—ensuring comprehensive sustainability planning at your fingertips.

Modeling Built for Your Community

ClearPath doesn't just give you a topline emissions number - together with ICLEI's technical support and online Academy resources, it helps you understand the sources of emissions in your community or for your government operations, using detailed local data.

Sophisticated Forecasting

Project your community's emissions trajectory to 2030 and beyond, while factoring in changes to the grid, population, and more. Members get a free business-as-usual forecast!

Technical Assistance

Effectively and easily complete your inventory, forecast emissions, and plan for reductions through one-on-one support from ICLEI experts.

Monitor Progress

Track the status of each action in your plan, and report on results and emissions reductions compared to those expected.

TESTIMONIALS

“The guidance and resources that ICLEI provided [to our cohort of governments] streamlined our process of creating GHG inventories for each city and the county.”

Sharon Grant
Owner of Eco Edge Consulting

“[ClearPath's] dynamic charts are a powerful tool to use during public meetings. The user interface is modern and intuitive. ClearPath helps us zero in on strategies that can achieve an impact.”

Scott Tess
Sustainability Coordinator, City of Urbana, IL

“While we’ve seen an important decoupling of emissions and population growth, ICLEI’s Contribution Analysis showed that we need to do much more to phase in renewable energy sources, develop clean transportation options, and make our homes and buildings more efficient.”

Matt Kuharic
Climate Change Program Coordinator for King County, WA

“With our baseline inventories archived in ClearPath, we are now using it to crunch our data and identify the most impactful strategies to reduce and eliminate carbon emissions. I look forward to increasing our utilization of ICLEI’s expanding capabilities.”

Rocky Mould
Former Energy Program Manager, Office of Climate Change, Sustainability, and Resiliency, City and County of Honolulu, HI

“Tempe adopted Climate Action Plan 2022 highlighting the city’s sustainability efforts and investments in programs, personnel and infrastructure. ICLEI’s staff and ClearPath were key to helping Tempe update the community’s greenhouse gas emissions inventory, measure progress, and set new targets.”

Grace Kelly
Energy Manager, City of Tempe, AZ

CLEARPATH FORECAST AND PLANNING WIZARD

Three Key Upgrades

- 1 Streamlined forecasting of business as usual emissions
- 2 Identification of high impact actions for the most effective emissions reductions
- 3 Pre-loaded inputs for quick modeling of high impact actions and scenario to reach target

The ClearPath forecast and planning wizard allows communities to easily apply actions and visualize a future emissions reduction scenario.

ABOUT ICLEI USA

ICLEI - Local Governments for Sustainability USA is the USA office of ICLEI, the first and largest global network of local governments devoted to solving the world's most intractable sustainability challenges. Our standards, tools, and programs credibly, transparently, and robustly reduce greenhouse gas emissions, improve lives and livelihoods, and protect natural resources in the communities we serve.

ICLEI developed and follows the five pathway framework to design integrated solutions that balance the patterns of human life and the built and natural environments.

Low
Emissions

Resilient

Equitable &
People-Centered

Circular

Nature
Based
